Exercise: Build a Responsive Shoe Store Website

Goal

Create a fully responsive website for a shoe store named "Shoe Paradise."

HTML Tasks:

1. Make a **header** with the title "Shoe Paradise."
2. Create a **nav bar** with links: Home, Products, About, Contact.
3. In the **main section**, add:
   - A grid of shoe products. Each should have an image, a title, and a price.
   - A sidebar with categories like "Running," "Formal," "Casual."
4. Add a **footer** with a copyright notice.

CSS Tasks:

1. Style the **header** with a dark background and white text.
2. Use **Flexbox** to arrange nav bar items.
3. Use **CSS Grid** for the layout of the main section.
4. Add a **hover effect** to scale up the shoe products.
5. Style the **footer** similar to the header.

Responsiveness:

- Make the website responsive: adjust the grid layout and the navigation for small screens using media queries.
